Prop governor must be capable of scheduling down to at least 1170 RPM. Recommendations: 1. Taxi between 900 & 1170 RPM, advance through 1170-1400 RPM range only after aircraft lined up for takeoff. 2. Feather/unfeather prop on ground only during engine start/shutdown or with aircraft headed into wind.

## 1. STC Holder Listing

- A. The STC holder corresponds to the modifier listed with the STC number in the Application Information section of this manual.
- B. Supplemental type certificate installations are the responsibility of the STC holder and the STC holder should be contacted if there are any questions or problems concerning the following:
  - (1) Installation approval
  - (2) Performance claims
  - (3) Foreign approval
  - (4) Compatibility with engine or airframe modifications
  - (5) Replacement of lost STC paperwork
- C. Information regarding ownership of supplemental type certificates and addresses of STC owners is not always reliable and is subject to frequent changes.
- D. The addresses presented in this section have been researched through the Federal Aviation Administration Summary of Supplemental Type Certificates and are correct to the best of Hartzell's knowledge.
- E. Please report any errors or discrepancies to Hartzell Propeller Product Support.
- F. When the holder of the STC is no longer able to be consulted, the local FAA Flight Standards office may be an additional source of information. The FAA would be considered the final authority regarding compatibility of an STC with a modified aircraft or an aircraft model not included in the STC.

APPENDIX - CONTENTS

1. Appendix.....3  
    A. Purpose.....3  
    B. Data Field Definitions .....3

(This page is intentionally blank.)

## 1. Appendix

### A. Purpose

- (1) The Appendix chapter of this manual is a reference tool only. Limited application information is arranged in a manner that allows the user to quickly scan for related applications. Refer to the Application Information chapter of this manual for more detailed information.
- (2) The data in the Appendix chapter of this manual is sorted according to Aircraft Manufacturer.

### B. Data Field Definitions

- (1) This Appendix chapter contains the following installation data:
  - (a) Aircraft Manufacturer
  - (b) Aircraft Model and Trade Name
  - (c) Aircraft TC/STC Number and Modifier
  - (d) Engine Mfg. and Engine power (HP and RPM)
  - (e) Propeller Model and Blade model(s) approved for installation
  - (f) Propeller Diameter/Range
  - (g) Spinner part number (if applicable)
  - (h) IDS Reference Number

**NOTE:** The IDS Reference number shown in the far right column of this appendix may be used as a look-up number to locate the corresponding, more detailed record located in the Application Information chapter of this manual.

- (2) Refer to the Data Field Definitions in the Application Information Chapter of this manual for a definition of each data field contained in this Appendix.

## 1. General

### A. General Information

- (1) The Spinner Mounting Kit chapter contains the parts list for each Hartzell Propeller Inc. spinner mounting kit, and Illustrations of the standard hardware configurations.

### B. Parts List

#### (1) Description of Columns

- (a) Item Number - Reference number given to that part in a specified illustration.
- (b) Part Number - Hartzell Propeller Inc. identification number for the part.
- (c) Description - Hartzell Propeller Inc. description of the part.
- (d) Units Per Assembly (UPA) - Designates the total quantity of an item required for the kit.
- (e) Overhaul (O/H) - Designates the parts to be replaced at overhaul.  
A "Y" identifies the parts that must be replaced at overhaul.

### C. Hardware Configuration

- (1) Shows the standard hardware stack-up for the spinner mounting kit.

- (a) To get spacing between the spinner assembly and the aircraft cowling, spinner mounting kit hardware stack-ups can be modified in accordance with the applicable Hartzell Propeller Inc. Owner's manual.

- 1 Table 1, "Spacer/Washer Thickness" in this chapter provides a list of spacer/washer part numbers and specifies the thickness of each item.
